

Interpreters Grant II Grantees

2011-2014

The purpose of the initiative is to continue enhancing the capacity of the local health departments to serve Limited English Proficiency (LEP) clients through the strategy of creating new Interpreter positions.

Grant recipients will be expected to match the \$20,900.00 with sufficient local funds to hire one interpreter into a new full time position. The grant plus local match must be enough to compensate the interpreter for full time salaries and fringe benefits. Local Health Departments are expected to demonstrate the progress and effectiveness of the program, and to sustain the interpreter position using local funds after three years of receiving funding from the Office of Minority Health and Health Disparities (OMHHD). OMHHD expects to continue improving coordination and collaboration among local health departments in order to eliminate health disparities and to remove barriers improving access to basic health care.

The new grantees for the next three years (2011-2014) are: Cabarrus Health Alliance, Dare County Health Department, Duplin County Health Department, Halifax County Health Department, Henderson County Health Department, Jones County Health Department, Robeson County Health Department, New Hanover County Health Department, Chatham County Health Department, and Orange County Health Department.
